

Dr. Danish Mazhar MA (Oxon), MBBS, PhD, FRCP

Present Appointment

Consultant in Medical Oncology, Addenbrooke's Hospital, Cambridge University Hospitals NHS Foundation Trust, Cambridge.

I am an established and highly experienced Consultant Medical Oncologist specialising in urological cancers. I am committed to an evidence-based approach to patient care, improving clinical standards and quality, and in striving for excellence always. I have been central to developing service provision for urological cancers in my region (for example by setting up a multidisciplinary trials clinic, revising follow-up protocols, developing treatment guidelines, and introducing new therapeutic regimes).

I have previously served as Lead Oncologist to the Regional Urology Site Specific Group. I am actively involved in Clinical Audit and Governance. I have conducted Departmental, Regional and National audits. I am Departmental Infection Control Lead and have overseen a significant improvement in measured standards.

Consultant in Medical Oncology, GenesisCare, Cambridge.
Consultant in Medical Oncology, Nuffield Hospital, Cambridge.
Affiliated Assistant Professor, University of Cambridge.

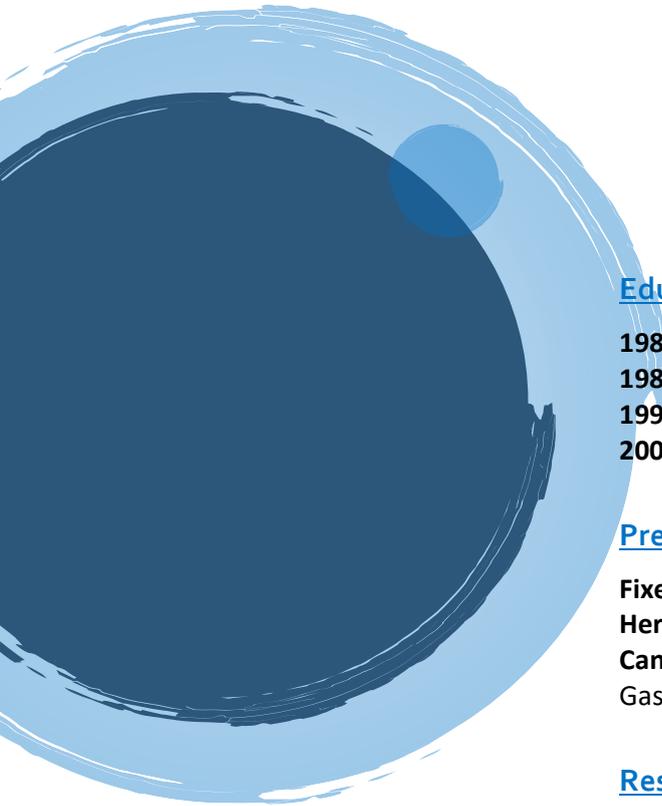

Medico-Legal Experience

I am a Consultant Medical Oncologist with 18 years' experience providing independent expert opinion in medico-legal matters. My practice covers a broad range of urological oncology conditions and standard of care issues, including diagnosis, management, surgical treatment, and follow-up.

I accept instructions from both claimants and defendants, with an approximate 60:40 claimant-to-defendant split, ensuring balanced and impartial opinion. I currently accept around 20 medico-legal cases per year, allowing sufficient time to deliver thorough, well-reasoned, and timely reports. I am experienced in preparing CPR-compliant expert reports, addressing breach of duty, causation, condition and prognosis, and have experience in joint statements and court proceedings when required.

Education

- 1980-1989** Berkhamsted Collegiate School
- 1989-1992** Merton College, Oxford University (Pre-clinical)
- 1992-1995** University College London Medical School
- 2001-2004** Imperial College London (PhD studentship)

Previous posts

Fixed Term Contract Consultant in Medical Oncology, East and North Hertfordshire NHS Trust (Lister Hospital, Stevenage and Mount Vernon Cancer Centre, Northwood).

Gastrointestinal (GI), hepatobiliary and breast cancers.

Research

I am an experienced clinical trialist and also have an interest in translational research, developing the interface between laboratory science and the clinical arena with on-going collaborations with colleagues from the University of Cambridge. I provide leadership in both early phase and large randomised multicentre clinical trials, and the promotion of research activity throughout my Cancer Research Network, and nationally. I am Network Lead for prostate, bladder and testis cancer research. I have extensive experience of collaborative clinical trials.

I am Regional Cancer Research Network Subspecialty Lead in urological cancers. I am the Chief Investigator for the UKP3BEP study in advanced germ cell tumours, and have been the UK Chief Investigator in multicentre Phase III trials in metastatic prostate cancer, as well as being a Principal Investigator for numerous other national and international trials including several landmark studies such as STAMPEDE, COU-AA-301, COU-AA-302, LATITUDE, AFFIRM, SPARTAN and PROSPER. Over the last 10 years, my centre has gained national recognition by its high recruitment to prostate cancer trials.
