

## Professor Thomas David Lewis Crosby OBE MB.BS, MRCP, FRCR

---

### National Clinical Director of Cancer for Wales

### Consultant Oncologist in Velindre Cancer Centre

As a consultant I have managed patients with **breast, lung and GI Cancer**. More recently I focus on GI Cancer.

As Clinical Director for the Wales Cancer Network, I have overseen the management, and improvement of all cancer services in Wales for over 10 years, leading 18 Cancer Site Groups covering all malignancies together with service and pathway groups such as primary care, diagnostics, surgery, oncology and palliative care.

I support service delivery, improvement, research and audit in all these cancer sites and led the development of the Cancer Service Improvement Plan 2022-25 and the Wales Cancer Network Board's prioritisation programme including the development of Cancer Prevention, Early Diagnosis, Person Centred Care and Cancer Information work streams. I led the development of policy and the delivery of the priority initiative in Wales: The Single Cancer Pathway which looks to transform patient pathways from referral, through diagnosis and treatment.

I have been recognised for service to cancer services in Wales and the UK with the award of an honorary Professorship by Cardiff University and an OBE in the New Year's Honours list.

### Medico-Legal

Undertaken more than 400 medico-legal cases in past 5 years, both for Claimant and Defence, relating to breach of duty but more with causation, condition, and prognosis.
